Brio® 612 Retractable Pleated Insect Screen

For openings up to 32'0" wide by 10'6" high

Brio® where ideas unfold

Watch your adventurous architectural ideas unfold into exciting reality with the Brio range of sliding and folding door hardware.

Brio is passionate about shaping the spaces in which people live, work and play. With subsidiaries in the UK and USA – Brio is recognized by architects worldwide as a leading design and manufacturing company.

Brio's R&D department brings a strong design element to the business, developing and testing

ground breaking concepts that continue to be at the forefront of the industry.

So it's no surprise our name Brio translates to Energy, Spirit and Vitality – the core values that drive us to always discover new solutions for our customers.

We are committed to the continuous improvement of quality. That is why Brio, located in Sydney, is certified to Quality Management System AS/NZS ISO 9001:2008.

Brio, part of the Allegion family of brands

Brio 612 Retractable Pleated Insect Screen

The Brio 612 Retractable Pleated Insect Screen offers a screening solution to any window or door application due to its innovative design. Developed for flexibility and tested for durability, the Brio 612 Screen is a popular product worldwide.

With the capability to span 16', the Brio 612 Screen is one of the largest single action screen products of its type in the world. Meeting screens can cover an expansive opening of 32' wide and 10'6" high.

Dimensions

Single Screen	Width	Height
Minimum	36"	30"
Maximum	16'	10'6"
Double Screen	Width	Height
Minimum	72"	30"
Maximum	32'	10'6"

Colors

Brio understands the importance of continuity for aesthetical purposes and so offers the Brio 612 Screen in Black, Silver and White with custom colors available.

White

Quality

The Brio 612 Screen is assembled in America with the finest quality materials to ensure excellence is maintained. Our purpose built robotic equipment provides accuracy and efficiency allowing the Brio team to act responsively for delivery of your screens.

The patented Brio 612 Screen has undergone rigorous testing and exceeded 150,000 cycles. The Brio 612 Screen is covered with a 5 year warranty which does not extend to damage caused to the mesh by pets, children or the occasional adult.

Performance

High strength, braided tensioning cords run horizontally to stabilize the screen and control vertical orientation of the handle bar. These tensioning cords run over multiple precision bearings to ensure the high quality, European polyester mesh slides smoothly with a low operating force. The use of precision bearings significantly increases the screen's life.

The tensioning cords help support the mesh during moderate weather conditions. The mesh has been designed to leave the channel in windy conditions as a safety feature which helps prevent tearing. If the screen does leave the channel it can be easily placed back inside.

Applications

The Brio 612 Screen is independent of any particular window or door system but can be easily installed on the inside frame of folding, sliding and french doors as well as many window types. This freedom allows the screen to be used in a multitude of applications. The intelligent design means the Brio 612 Screen can be fully integrated into windows and doors discreetly while in operation or retracted.

This is achieved with low profile aluminum sections and the pleated, UV stable mesh. Many systems offer a flat mesh which is prone to sagging and requires an unsightly canister to house the screen mesh. The Brio 612 Screen is tailor made to integrate seamlessly with Brio's Weatherfold exterior systems 4s (top hung), 5c (bottom folding) and Brio's Window or Servedy. It can also be used with our straight sliding systems Single Run and Timberoll.

Postless Corner

An advantage of the Brio 612 Screen is the ability to screen corner openings without the need for a corner post, providing stunning uninterrupted views.

Corner applications are possible with all of Brio's Weatherfold exterior, folding systems and our 97HS hybrid sill which utilizes wood and aluminum for self draining and easy installation.
